IBAN NL86PSTB0001566583.

It's size grew to twice as large, partially in colour and completely in English. This is the new catalogue / handbook for “Revenues Netherlands Indies Japanese occupation 1942-1945 and Republic of Indonesia Administration 1945-1949”. The publication was compiled by Henk Ramkema and Leo B. Vosse of the Dutch Dai Nippon stamp society. This is the 2nd issue from a handbook that was issued for the first time in 1999. There are however many differences between the 1st and 2nd issue. Of course the catalogue grew due to recent discoveries and using new ideas but there was another, more influential change: The first issue was a summary of all as good as it gets. The 2nd issue shows prices as well. The editors seemed this to be of importance because of a growing demand for this matter. Its content was praised all the way. The authors did their best to document the area and time period for revenues and to help the users of this catalogue as much as possible. The illustrations; descriptions and as well the chapters about rates, calendars used at that time and a table to translate the Katakana language are supporting to help the collector.
